

Genesis ATM

Automatic Towel Machine

Description

The future of laundry technology is in Chicago today. **Genesis Automatic Towel Machine** uses A.I. deep learning and vision technology to automatically pick and feed towels of multiple sizes into a sorting towel folder. Genesis automatically picks up a towel, correctly orients and centers it, then accurately feeds it into a towel folder such as Air Chicago Quattro. From there, Quattro folds and sorts the towels into neat bundles for a hands-free finished product. For healthcare facilities with smaller towels, the **Genesis Care** provides the same smart technology in a smaller footprint.

Items

Hand Towels, Bath Towels, Pool Towels, Bath Mats, Spa Towels, and More

Piece Size Range

Genesis

Length: Max: 86.5" (2200 mm)

Width: Max: 43.25" (1100 mm)

Genesis Care

Length: Max: 43.25" (1100 mm)

Width: Max: 27.5" (700 mm)

Standard Features:

- Uses smart A.I. deep learning software and high-resolution cameras to continuously gather data to refine and improve the towel handling process.
- Works 24/7 365 days a year
- Remote troubleshooting
- Internet connection assures that Genesis can be remotely updated to monitor and improve productivity.
